Innovative technology – your advantage

Compact CNC machines Made in Sweden that Increase your productivity and improve the quality!

e3500

Edge polishing revolution!

- ▶ Compact size
- ▶ Hydraulic spindle motor
- ▶ Automatic tool changer
- ▶ Vacuum table
- ▶ Affordable

Increase your productivity and improve the quality

The state of the art technology and optimizing has resulted in **e3500**, a compact, high performance edge profiling and polishing machine.

e3500 is designed to be a user friendly, yet powerful fully automatized machine with automatic tool change. The PLC control system and touch screen panel comes programmed with a set of standard profiles, but it allows other kinds of shapes to be created too. An optional holding device allows for clamping of thin and narrow workpieces to be machined such as strips and borders.

Spindle power:	3 hp
Max workable length:	3500 mm/11.66ft
Thickness range:	10-100 mm/3/8" - 4"
Automatic tool changer:	8 pos
Height of worktable:	950 mm/35"
Length:	4540 mm/179"
Depth:	1400 mm/55"
Hight:	1340 mm/53"
Weight:	800 kg/1,760lbs
